

# Team up with Evonik

Add value and cost savings to biodiesel

Evonik delivers successful solutions for biodiesel formulators through superior chemistry and direct access to our technical experts. Our sodium methylate solution (NM30) is a high-performance catalyst that provides margin improvements through direct metering, is ready-to-use and yields a purer end-product. Our VISCOPLEX® Cold Flow Improvers solve the problematic cold flow properties of biodiesel at low treat rates. For our complete product line and more information, visit [www.evonik.com/biodiesel](http://www.evonik.com/biodiesel).
